

Map the route and the openings.

Bring your layout, access needs and questions to the estimate review.

A The property and the purpose

Project address

Name / best contact

Approximate fence length (feet)

What should the fence do?

- ☐ Privacy ☐ Dog enclosure ☐ Front yard / garden ☐ Horse property
☐ Business perimeter ☐ Temporary / construction ☐ Other:

B Sketch the route

Mark corners, gates, retained fencing and grade changes. Label any uncertain boundary.

F = new fence G = gate R = remove Dashed line = route still to confirm

C Plan the usable gate opening

Measure the widest item that needs to pass, then note turning room and ground slope.

Opening / location	Person or equipment	Width needed	Approach / slope

Compare the same scope.

Use the same route, materials and openings when you compare estimates.

D

Choose the system and removal scope

☐ Wood

☐ Vinyl

☐ Aluminum / metal

☐ Chain link

Style / height / preferred finish

Sections to retain or connect to

Fence and concrete footings to remove

E

Ask for a clear estimate

Write the proposed specification or inclusion for each item. Keep exclusions visible.

Scope item	Estimate A	Estimate B
Fence footage, height and material system		
Post / footing and corner details		
Gate opening, frame, posts and hardware		
Removal, haul-away and retained footings		
Access, ground conditions and protection		
Approvals, timing and scope exclusions		

F

Bring the details that change the plan

Photos from both ends; slope or runoff photos after rain; boundary / approval documents; known private services; equipment dimensions; pet arrangements; material-access photos.
